MTopGo is a novel algorithm of module identification for PPI Network analysis [1]. It is designed to consider two key aspects of these models, the topological properties of the network and the

[Controller Area Network - CAN Information](#)

The Bosch CAN specification version 2.0 can be downloaded from here. What is CAN? Controller Area Network (CAN) is a serial network that was originally designed for the automotive industry, but has also become a popular bus in industrial automation as well as other applications.

[Bridge the docker containers to external network ...](#)

Skill Level: Any Skill Level. OverviewUsing the default docker0 bridge and the port mapping works for most of the scenarios, but not all the scenarios, for example, you want to put all the docker containers in a flat network to provide full-access between the containers on different docker hosts.

[CAN bus - Wikipedia](#)

Multiple access on CAN bus is achieved by the electrical logic of the system supporting just two states that are conceptually analogous to a wired AND network. Frames. A CAN network can be configured to work with two different message (or "frame") formats: the standard or base frame format (described in CAN 2.0 A and CAN 2.0 B), and the extended frame format (only described by CAN 2.0 B).
