Now coming to 10 s complement, it is relatively easy to find out the 10 s complement after finding out the 9 s complement of that number. We have to add 1 with the 9 s complement of any number to obtain the desired 10 s complement of that number.

[Subtraction by Addition \(Complements Method\)](#)

Subtraction by Addition (also called the Complements Method) Here we see how to do subtraction using addition! (I don't recommend this for normal subtraction work, but it is still a valid and interesting way to subtract.) [Method of complements - Wikipedia](#)

In mathematics and computing, the method of complements is a technique to encode a symmetric range of positive and negative integers in a way that they can use the same algorithm (hardware) for addition throughout the whole range.

Standard methods were used for disruption and complementation of the LHC1 gene in strain H99 as described previously using two PCR-amplified fragments and a 1.3-kb PCR fragment of the URA5 gene previously described to effect a 1.4-kb deletion within the LHC1 coding region (see Supplemental Materials and Methods in Text S1) and was complemented using a 3.6-kb genomic fragment of the LHC1 gene.
