Grounded Theory. Grounded theory is an inductive methodology that provides systematic guidelines for gathering, synthesizing, analyzing, and conceptualizing qualitative data for the purpose of theory construction.

Introduction to Grounded Theory

In grounded theory, it is normally done quite informally. For example, if after coding much text, some new categories are invented, grounded theorists do not normally go back to the earlier text to code for that category. However, maintaining an inventory of codes with their descriptions (i.e., creating a codebook) is useful, along with pointers to text that contain them. In addition, as codes
