Abstract. Inflammation is an essential response provided

by the immune systems that ensures the survival during infection and tissue injury. Inflammatory responses are essential for the maintenance of normal tissue homeostasis.

Inflammation Causes, Symptoms, Process, Treatment

...

Inflammation is an acute (short term) response by living tissue to any injury. It is usually followed by repair and regeneration after the injury, provided that the tissue was not severe enough to cause cell death (necrosis).

Inflammation is a life sustaining mechanism to help the body cope during and just after an injury but inflammation often prevents proper regeneration and repair. Chronic
