Transport - Wikipedia

Transport or transportation is the movement of humans, animals and goods from one location to another. In other words the action of transport is defined as a particular movement of an organism or thing from a point A to a Point B. Modes of transport include air, land (rail and road), water, cable, pipeline and space.

Mode of transport - Wikipedia

Mode of transport is a term used to distinguish substantially different modes of conveyance. The different modes of transport are air, water, and land transport, which includes Rails or railways, road and off-road transport.

Transportation | The Canadian Encyclopedia

The importance of transportation to a trading nation as vast

as Canada cannot be underestimated. The great distances between mines, farms, forests and urban centres make efficient transport systems essential to the economy so that natural and manufactured goods can move freely through domestic and international markets.
