Adelmidrol: a new ALIamide for chronic inflammation
ADELMIDROL: a new topical ALIamide for chronic inflammation
Adelmidrol is the diethanolamide derivative of azelate acid, i.e., naturally occurring dicarboxylic acid that has long proven to be an effective topical treatment for human inflammatory skin disorders (1), and whose mechanism of action have been recently and thoroughly investigated (2).

[Galectins in parasite infection and allergic inflammation ...](#)
Abstract. Galectins are increasingly recognised as important immunological mediators of homeostasis and disease regulation. This paper gives an overview of current knowledge of galectin involvement in parasite infection and allergic inflammation, two very different but immunologically linked phenomena.

New perspectives have emerged in inflammation research. While historically, the therapeutic emphasis has been on inhibiting pro-inflammatory molecules, recently a new class of immune mediators have been uncovered that have active roles in resolving inflammation. Further, there is evidence that these
