A parametrix of a pseudo-differential operator is a pseudo-differential operator such that and are pseudo-differential operators of order  $s$ , i.e. are integral operators with a smooth kernel. Suppose that  $\sigma$ ,  $\sigma'$ , and  $\sigma''$  that is the symbol of  $\mathcal{L}$ .

In mathematical analysis a pseudo-differential operator is an extension of the concept of differential operator.

Pseudo-differential operators are used extensively in the theory of partial differential equations and quantum field theory.

Abstract. In this chapter we discuss the basic theory of pseudodifferential operators as it has been developed to treat problems in linear PDE. We define pseudodifferential operators with symbols in classes denoted  $S_{\rho, m}$  introduced by L. Hörmander.
