Safety Inspection vs Safety Audit | Graphic Products
Safety Inspection vs Safety Audit. There's no one right way to assess the effectiveness of workplace safety programs. OSHA citations, days away from work, and employee complaints all reflect elements of a company's culture of safety.

Auditing a Safety and Health Management System
a safety and health management system for the healthcare sector. Audit is a function of all developing and progressive organisations. The outcome from an audit can facilitate an organisation to be knowledgeable about its areas of non-compliance and to identify and implement corrective action to correct these areas. In the healthcare sector it can be used to identify areas of non-compliance and

Health and Safety Audit - How to Conduct an Audit Now

An audit of your health and safety management systems identifies whether the safety systems are operating effectively, or whether they need to be more efficient. An audit may be an independent event or part of an ongoing program. Here we look at how to conduct a health and safety audit:

What is a Safety Audit? - Definition from safeopedia
A safety audit is a more thorough process than technical inspections or spot-check inspections. In addition to ensuring compliance, safety audits also review the company's safety documentation and determine whether their record-keeping systems are adequate or need to be more robust.
