Implementing social network analysis for fraud prevention

Fraud detection and analysis has traditionally involved a silo approach. Rarely does an investigator look across product lines to identify fraudulent connections. However, with the introduction of social network analysis (SNA), investigators are now able to detect data patterns within and across product lines as a potential crime ring or group is developing, saving companies from losses as the **Community Detection in Social Networks and Performance Evaluation of Algorithms** using community detection toolbox in matlab for your own datasets and observing the clustering pattern.
