1000 is the smallest 4 digit number but of the two factors, it is only divisible by 2. As 999 is obviously divisible by 3 then $999 \div 3 = 1002$ is also divisible by 3 and, as an even number, is also

[Subtracting Numbers Within 100 With Regrouping](#)

The first thing to do is to subtract the ones. But, there's a big problem! But, no worries. We can fix it! What we're going to do is borrow from the tens stripe.

Machine Language For Beginners - Chapter 2

Imagine that we wanted to remember the result of a subtraction. When two numbers are subtracted, they are actually being compared with each other. The result of the subtraction tells us which number is the larger or if they are equal. ML has an instruction, like a command in BASIC, which compares two numbers by subtraction. It is called CMP (for compare). This instruction sets "flags" in the

Mixed Addition and Subtraction Word Problems

Addition and Subtraction Word Problems Worksheets
Practicing the operations individually helps build confidence, but an important word problem skill is figuring out which math operation is needed to solve a specific problem.

Double Digit Subtraction Worksheet - Regrouping ...
